Point in Time Results

8,350 persons experiencing homelessness were counted during PIT 2016 including:

- 318 persons who were unsheltered, i.e. living on the street or places not meant for habitation (all persons were unaccompanied, no persons in families were found to be unsheltered at PIT);
- 6,259 persons in Emergency Shelters (2,594 unaccompanied individuals and 3,665 people in 1,136 families); and
- 1,773 persons in Transitional Housing (771 unaccompanied individuals and 1,002 people in 355 families).

The number of persons experiencing homelessness at PIT increased by 14.4 percent from the 2015 PIT count.
- The number of unaccompanied homeless individuals counted decreased by 3.8 percent from last year, but the number of families increased by 31.8 percent.

The increase is primarily due to housing affordability challenges in the District, and increased demand for stable housing assistance that is brought to bear on the homelessness system. Also impacting PIT was the District’s implementation of year-round access to family shelter that began in 2015. In past years, family shelter placements had largely been limited to the District’s Hypothermia season (November through March). From April to October 2015, 425 families were placed as a result of the new policy, as compared to 12 placements made from April to October 2014.

As a result of the move to year-round access, the District experienced higher family shelter occupancy during PIT 2016, though year round access to shelter allowed many families to receive the homeless services they needed before the Hypothermia season began. Although family shelter occupancy was higher throughout the winter, a new District-funded prevention program helped more than 1,100 families avoid homelessness during Hypothermia 2016 and led to an overall decrease in the number of families placed in District shelters during Hypothermia 2016 as compared to 2015.

**Permanent Housing and the Formerly Homeless**

On the night of PIT there were 4,901 individuals and 7,516 people in 2,347 families residing in Permanent Supportive Housing, Rapid Rehousing, or other permanent housing for persons who had previously experienced homelessness. This is an 11 percent increase among formerly homeless individuals and a 16 percent increase among formerly homeless families from last year’s Point-in-Time due to increased investments in the types of housing named above.

The 3.8 percent decrease in unaccompanied individuals experiencing homelessness is largely due to the further development of the District’s Coordinated Assessment and Housing Placement (CAHP) System, which is used by providers to determine the most appropriate housing intervention needed to help someone exit homelessness for permanent housing. CAHP is primarily responsible for the decreases in chronic homelessness and the number of veterans experiencing homelessness detailed in the Quick Facts section.
